☑ It is difficult to know failure Modes unless advance method Of monitoring are used.

☑It measures toxic gas in very low concentrations

☑It has ability to detect wide range or gases.

☑Fixed flammable gas
Detection system is to be
Installed to detect flammable
Gases.

☑Major problem of using GC-MS for drugs confirmation testing.

☑ Board spectrum drugs screening is that GC-MS method are not capable

☑ Derivatization is required to increase volatility and thermal stability.

☑This GC-MS are limited to thermaloy stable and volatile components

✓ Spectrum drug screening are not capable of directly analysing that are polar or thermal

GAS LEAKAGE MONITORING AND ALERTING SYSTEM

☑It is muddled to investigate issues or grow new methods

☑HPLC can be costly

☑It required countless costly organics,needs a force supply and ordinary support is required
